Kicukiro District, Kigali City, Rwanda

Summary

I am an enthusiastic software engineer who is passionate about using cutting-edge technologies to create innovative solutions. I specialize in the MERN stack (MongoDB, Express.JS, React.Js, and Node.js), as well as Ruby. I have 3+ years of experience in software engineering, with a focus on developing web and mobile applications. I am highly organized and detail-oriented, with excellent problem-solving and communication skills. I thrive in fast-paced environments and enjoy learning new technologies and exploring new ideas. My goal is to continue to grow and learn, while contributing my skills to develop high-quality applications.
